NEP-Aligned Syllabus for Schools - Classes 8 to 12

Aligned with NEP 2020 & NCF-SE 2023 · 100% risk-free · Computer Lab Mode

1. Why Financial Literacy, Why Now

NEP 2020 and NCF-SE 2023 made financial literacy a mandatory part of school education. NCERT textbooks carry the chapters, but there is no path from theory to practice: students learn formulas without seeing how inflation affects pocket money or how global oil prices impact India. VedKuber closes that gap with a Live Paper Trading Simulator - every student gets a virtual Rs 25,000 portfolio in real-time markets, with zero real money at risk.

2. The VedKuber Academy - Coverage at a Glance

The Academy is the theory backbone of the school program: a structured curriculum from money basics to markets and risk, taught inside 40-minute interactive periods. Current production coverage (verified on the live platform):

Structured levels	23 levels (15 free for schools to evaluate)
Chapters	144 chapters, sequenced from money basics to F&O and risk
Assessment	589 quiz questions with automatic scoring
Languages	Hindi and English
Simulator	Real-time NSE paper trading with a virtual Rs 25,000 portfolio
Global exposure	Simulated NASDAQ, FTSE and Nikkei markets

3. The 40-Minute Period

0-10 min Theory: the NCERT-linked chapter, taught from the ready-made lesson plan.

10-30 min Simulator application: students apply the concept on their live virtual portfolios.

30-40 min Debrief: guided discussion of what moved, why, and what risk taught them.

Every period ships with a ready-to-teach 40-minute lesson plan, quizzes and worksheets - the teacher only shares the Class Code. Weekly performance reports go to the teacher automatically.

4. Mapping to Classes 8-12

The curriculum ladder maps the Academy's progression onto class stages. Schools pick the entry level per class; each stage builds on the previous one and ends with simulator work.

Class 8	Money and the economy: what money is, saving vs spending, banking basics, why prices rise (inflation on pocket money), the need to invest.
Class 9	Companies and markets: what a share is, why companies list, reading a basic quote, the difference between investing and gambling, market ethics.
Class 10	Building a portfolio: diversification, risk vs return, index funds, the cost of panic selling - practised live on the virtual Rs 25,000 portfolio.
Class 11	Market mechanics in depth: order types, liquidity, sector cycles, macro links (oil prices to Indian prices), reading company fundamentals.
Class 12	Derivatives and risk management: futures and options intuition, hedging, position sizing, and why even professionals measure and publish their accuracy.

5. NEP 2020 / NCF-SE 2023 Outcomes Addressed

- Experiential learning: every concept is applied the same week in the live simulator (NEP's shift from rote to hands-on learning).
- Financial literacy as a life skill: NEP 2020 lists financial literacy among essential numeric and life competencies.
- NCF-SE 2023 curricular goals: understanding money, markets and risk as part of developing rational, informed decision-making.
- Responsible technology use: students see an AI system publish its own accuracy honestly and learn risk discipline.

6. Safety, Privacy and Compliance Posture

- 100% paper trading: no real money is ever at risk; nothing on the platform is a brokerage or investment service for students.
- Computer Lab Mode: students log in with a shared School ID on school desktops - no personal phone numbers or email IDs of minors are collected.
- Data privacy: the platform collects no student contact data; portfolios are identified only inside the school's own class roster.
- Brutal honesty: the platform's AI publishes its own live accuracy (currently 49.7%) and locks live trading when student risk runs high.

One Plan. One Annual Invoice. Whole School.

Rs 999 per student per year - billed to the SCHOOL as one annual invoice. Students never pay individually; the school covers everyone under a single yearly payment. The plan is the same one individual learners use, all features included: Academy, Paper Trading, AutoPilot, Global Markets and the Advanced Quant Terminal. The school partnership is part of that single invoice: Teacher Dashboard, Class Codes, Computer Lab Mode, free 1-hour teacher training, the Teacher's Playbook PDF, weekly performance reports and 24/7 admin support. One annual invoice covers ALL students (Classes 8-12); get your school's exact quote in the free demo at www.vedkuber.in/school or write to support@vedkuber.in.
